

Application for Clinical Waste Collection

Aylesbury Vale District Council offers a free weekly collection service for domestic clinical waste.

To ensure this service is provided to those who require it, we conduct an annual audit on all householders across the Vale registered to our clinical waste collection service.

To remind you, there are **three** different types of clinical waste:

1. Sharps collection

Sharps including needles and syringes should never be put in normal rubbish bin, even if they haven't been used. They should always be placed in a sharps box, which we will collect and dispose of safely.

2. Waste that can be disposed in your green refuse bin

Non-hazardous waste such as nappies, incontinence pads and sanitary items do not require specialist treatment or disposal and can be disposed of in your green refuse bin. We provide a larger and/or additional green refuse bin free of charge to accommodate non hazardous/offensive waste.

3. Waste that needs to be collected in orange sacks

Hazardous waste needs to be sent to be incinerated in order to prevent infection, this includes items such as:

- Swabs and wound dressings/bandages,
- wound vacuum drains or pumps; and
- home dialysis waste (except empty saline or glucose IV bags which can be put in your green refuse bin).
